FACE SHIELD MOD. 437 COMPLET

FACE SHIELD 437 COMPLET

Description

The face shield mod. 437 Complet has been designed to provide protection in forestry work, gardening, felling and cutting, clearance and similar activities that require joint protection of the head, eyes, face and ears. The set is made up of a helmet, two earflaps and a collapsible grille with anchoring for the helmet. When ear protection is not required, the earflaps can be tucked into the helmet.

Helmet

Electrically insulating helmet for working on installations not exceeding 1000 V a.c or 1500 V d.c (low voltage installations). Made of HDPE. Plastic 6 point harness and manual adjustment. Working temperature: -10 °C / + 50°C.

Ear-muffs

The caps are made of ABS and have polyester sound absorbing foam inside. The black cushion contains 20 mm thick polyester covered with anti-allergy PVC. SNR: 27dB

Visor

The visor consists of metal mesh screen edged in black plastic and measures 320 x 201 mm. Top plastic part of the visor counts on 2 circular drills plus other two 2 rectangular ones, for its connection to the mount..
